About NPTEL ()

How does an NPTEL online course work? ()

Week 0 ()

Week 1 ()

Week 2 ()

Week 3 ()

Thank you for taking the Week 11 : Assignment 11.

Week 11 : Assignment 11

Your last recorded submission was on 2024-04-03,Due date: 2024-04-10, 23:59 IST. 19:34 IST

1) Select the correct statement regarding selenium library ***1 point***

- ○ Selenium is primarily used for web browser automation
- ○ The web driver in selenium allows a way to interact with web browsers
- ○ The Keys Class provides a set of special keys that can be used for keyboard interaction
- ◉ All of the above

2) Which of the following tasks in WhatsApp can be automated using selenium? ***1 point***

- ☑ Sending Media Files
- ☑ Reading Messages
- ☑ Creating and Managing Groups
- ☑ Updating Profile Information

Assessment submitted.

week 4 ()

Week 5 ()

Week 6 ()

Week 7 ()

Week 8 ()

Week 9 ()

Week 10 ()

Week 11 ()

Browser Automation Watsapp using Python - Part 01 (unit?unit=227&lesson=228)

Browser Automation Watsapp using Python - Part 02 (unit?unit=227&lesson=229)

Browser Automation Watsapp using Python - Part 03 (unit?unit=227&lesson=230)

3) Read the given code and identify the correct statement. ***1 point***

```python
import pytz

def does_something():
    variable = [tz for tz in pytz.all_timezones if tz.startswith('Asia')]
    return variable

x = does_something()
for _ in x:
    print(_)

```

- does_something returns a list of all time zones in Asia
- the above code prints all time zones in Asia
- The output of the code can change depending on the version of pytz used
- (●) All of the above

4) Read the given code. What is the output of does_something(2022,2,29).(NAT)

```python
import calendar

def does_something(year, month, day):
    variable = calendar.monthrange(year,month)
    return int(1<= day<= variable[1])
```

0

1 point

5) Read the given code.

```python
def checks_something(year):
    return (year % 4 == 0 and year % 100 != 0) or (year % 400 == 0)

# Read years from a text file
file_path = 'years.txt'
with open(file_path, 'r') as file:
    years = [int(line.strip()) for line in file]

count = sum(1 for year in years if checks_something(year))
```

Assume the file years.txt contains the following data.

- Browser Automation Watsapp using Python - Part 04 (unit?unit=227&lesson=231)
- Fun with Calendar - Part 01 (unit?unit=227&lesson=232)
- Fun with Calendar - Part 02 (unit?unit=227&lesson=233)
- Fun with Calendar - Part 03 (unit?unit=227&lesson=234)
- Fun with Calendar - Part 04 (unit?unit=227&lesson=235)
- Fun with Calendar - Part 05 (unit?unit=227&lesson=236)
- Fun with Calendar - Part 06 (unit?

```
2000
2007
2004
2009
2001
```

What is the output of the code (NAT)

2

1 point

6) Read the given code.

```
import calendar

def count_something(year):
    count = 0

    for month in range(1, 13):

        day_of_week = calendar.weekday(year, month, 13)
        if day_of_week == calendar.FRIDAY:
            count += 1

    return count
```

Enter the value of int(count_something(1996)==count_something(2024))

1

1 point

7) Read the given code.

```
def count_(s, e):
    count = 0

    for year in range(s, e + 1):
        if (year % 4 == 0 and year % 100 != 0) or (year % 400 == 0):
            count += 1

    return count
```

Enter the value returned by count_(1990,2024)

9

1 point

8) In addition to the first birthday celebration, Koreans often celebrate "MiSeDol," which marks the completion of the 100th day after a baby's birth. This is considered
